

UMM series

Description:

The UMM series folding filter element combines the characteristics of deep filtering technology and filter material folding, with multi-layer tapered aperture filter material structure and graded cutoff to ensure that the filter core has high pollution capacity and filter area, low pressure drop and high flux. Excellent filtering ability of impurities, especially for high suspension particles, colloid substances and high viscosity liquid filtration. Wide chemical compatibility, can filter various acids, bases and solvents.

Features:

Multilayer gradient is aperture distribution, Carrying large amount, Long service life

Excellent impurity removal ability, especially suitable for viscous, colloid containing liquid filtration

Extensive chemical compatibility, all kinds of acid, alkali and solvent can be filtered

Large filtration area, low pressure drop , high flux

Application area:

Optical resistance filtration, high purity water filtration

Ink, electroplating solution, metal etching solution filter

Filtration of fermentation broth, liquid medium, additives, intermediates, and final liquid products

High precision and sterilization prefiltration of serum, tissue culture medium, culture medium, preparation of vaccine, barter water, various raw materials, antibiotics and other liquid

Beer clarification filtration, alcohol, mineral water, water filtration

Back water filtration in petroleum industrial fields

Filtration of organic solution, acid and alkali liquor in various chemical industries

Prefiltration of reverse osmosis system

Technical parameters:

Outer diameter	2.7 "
----------------	-------

Filter area	0.6m ² /10 "
Sealing ring material	Fluorine rubber, Silicone rubber, Ethylene propylene rubber
The filter material	polypropylene
Guide layer material	polypropylene
Filtration precision (μm)	0.1,0.22,0.45,1,2,5,10,20
Entrapment efficiency	99.9%
Filter length	10 " , 20 " , 30 " , 40 "
Interface adaptation code	226 接口（三脚架/翅片/平封）, 222 接口（三脚架/翅片/平封）, 226 接口 (不锈钢衬/三脚架), 222 接口 (不 锈钢衬/三脚架), 两端通 DOE
Internal skeleton material (center rod)	Reinforced polypropylene
End cover material	Reinforced polypropylene
External skeleton material (shell)	Reinforced polypropylene
Maximum operating temperature	80°C
Maximum working pressure (21°C)	4.0bar
Maximum working pressure (80°C)	2.4bar
Disinfection temperature time	121°C, 30 minutes each time
Mobile hot water	85°C, 30 minutes each time

sterilization	
---------------	--
